

- ### PARK PROGRAM ELEMENTS
- 1 Gated entry with stone columns flanked by boulder and plantings.
 - 2 Asphalt trail connecting school to the park.
 - 3 Concrete skate feature with parking and multiple skill elements (rail, ramps, steps, table top, etc.)
 - 4 Park entry monument made with stone to match entry gate columns. Flanked by a manicured lawn, plantings and a reforested area.
 - 5 Seating pavilion with picnic area and water fountain leading to a central mall connecting across the loop road into the main park.
 - 6 Regulation basketball courts with exterior grade goals and outdoor playing service. Also fenced to prevent balls from entering into loop road.
 - 7 Main park entry plaza. The plaza contains an accessible drop off as well as a veterans monument made from boulders with flag poles to fly each area of service's flag. The plaza also will contain a paver pattern depicting the towns seal in the middle of the flag monument.
 - 8 Miracle field with ADA access across the entire complex. Fields will be surfaced with ADA accessible materials and will all be on the same grade with no steps. The field will also have a scoreboard, dugouts, bleachers and seating areas for picnics.
 - 9 Park entry plaza connecting users to all elements of the park. This area contains a seating area and stone entry wall leading into playgrounds, the miracle field and splash pad areas. Bathroom facilities will be located in the center of the space. Landscaping will contain boulders in plant beds and in the plaza paving to reflect the natural features that make up the park.
 - 10 Splash pad with multiple water fountain areas. The theme will reflect the character of the park with boulders planted throughout. The splash surface and a paving pattern will create the effect of a stream moving through the space. There will also be plantings throughout to create the feel of a natural stream bed. Boulders will also be placed as seat areas for users.
 - 11 Playground areas. Each area will be ADA accessible with rubber play mulch. There is a tot lot space and equipment for older children that is separated by a treed promenade. Each space will be planted with nature inspired plantings similar to the splash pad areas and contain boulders for sitting and for play.
 - 12 Formal Lawn. This space will be directly in front of the Event Building. The lawn will be graded to allow for special events such as weddings.
 - 13 Event Building. The event building is oriented to capture views of the formal lawn, central green, rock outcroppings and pond. The entry is off the formal lawn and also provides a deck area for receptions looking onto a private garden and the sites natural features.
 - 14 Maintenance area. This area contains vehicle access to the Event building as well as storage unit for the park and a dumpster pad.
 - 15 Central Green. This area is turf and flanked by pathways to connect the active areas to the amphitheater area. This space is for more passive activities and views to the pond. There will be boulder outcrops throughout to denote pathway intersections and to define seating areas within the green. The space also provides opportunity for festivals or overflow seating for the amphitheater.
 - 16 Trail connection to other trails and access to rock outcropping.
 - 17 Amphitheater with the capacity to hold 200 hundred people. This space is positioned to capture views of the pond and take advantage of existing grades to create an outdoor theater. Seats will be created with concrete walls and turf walkways. The amphitheater also features access to the pond through an aluminum boardwalk area. There is also a stone seat wall to separate the boardwalk area from the amphitheater and to create an area for seating and dining by the water.
 - 18 Pump track tucked into the forest edge and planted with evergreens to create separation from other paces. There will also be benches and picnic tables provided in this area. It also located in close vicinity to trails that connect the central park to the larger trail system.

NOTE: CONCEPTUAL SITE PLAN SUBJECT TO CHANGE. CONCEPTUAL SITE PLAN PREPARED AS A PRELIMINARY CONCEPT PLAN FOR NEW CENTRE PARK
